REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 16-20 are considered allowable since when reading the claims in light of the specification none of the references of record alone or in combination disclose or suggest the combinations of limitations specified in the independent claims. As to claims 16-18, the prior art of record does not teach obtaining a first angular difference between polar coordinates of the received estimate and polar coordinates of a nearest in angle ideal symbol having zero as a value for the particular bit; obtaining a second angular difference between polar coordinates of the received estimate and polar coordinates of a nearest in angle ideal symbol having one as a value for the particular bit.

As to claim 19, the prior art of record does not teach receiving one or more differential encoded OFDM signals in the wireless receiver via the multiple antennas as a result of a transmission of a differential encoded OFDM signal in which the multibit phase shift key symbol is differentially encoded. As to claim 20, the prior art of record does not teach a soft decision processor coupled to the symbol estimator and operative to obtain for a particular bit of the multibit phase shift key symbol a first angular difference between polar coordinates of the received estimate and polar coordinates of a nearest in angle ideal symbol having zero as a value for the particular bit. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany
